DVC TELCO

Allowable International Roaming Operator List

Updated November 2026

Summary

This list shows the overseas mobile networks your DVC Telco service can roam on. If your phone does not connect automatically when you arrive overseas, you can manually select one of the preferred (P) networks below for your destination (see our International Roaming FAQ & Troubleshooting guide). Networks marked F (Forbidden) should not be selected.

Pay-as-you-go (PAYG) international roaming is barred. You can only roam on networks marked Yes in the Travel Pack column, with an active International Roaming Travel Pack. Networks marked No are shown for reference only — your service will not work on them.

Legend

Column	Definition
Destination	The country or location where the network operator provides service.
Network Operator	The roaming partner network. Operators sometimes rebrand, so the name shown on your phone may differ — match the MCC-MNC code instead.
Type: P	Primary preferred roaming network. Your traffic is steered to this network first.
Type: N	Non-preferred network. Used if the primary preferred network is not available.
Type: D	Default network — the only roaming partner available in that location.
Type: F	Forbidden. Traffic is steered away from this network; do not select it manually.
MCC / MNC	Mobile Country Code and Mobile Network Code, which together identify the network (shown as MCC-MNC).
VoLTE	Y = VoLTE (4G voice calling) is available on this network while roaming.
E-Call	Where VoLTE is available, how emergency calls are carried: V = VoLTE, CS = Circuit Switched.
Travel Pack	Yes = you can roam on this network with an active International Roaming Travel Pack. No = roaming is not available, as PAYG roaming is barred. * India: Bihar, Orissa (Odisha), UP East and West Bengal service areas are excluded.

Roaming operator list

Destination	Network Operator	Type	MCC	MNC	MCC-MNC	VoLTE	E-Call	Travel Pack
